SUBJECT INDEX

Acceptability of PVC-overwrapped pork retail cuts 391
Acceptability of rice-soy snacks 715
Acetic acid taste in water and bread 201
Acid soak, effect on *S. aureous* in fermenting tempeh 81
Acidity in quality control of tomato paste 145
Acids, taste in water and bread 201
Activation energies of salt diffusion in potato 443
Activation energy in validation of a time-temperature-integrator 21
Additives, effect on potato drying 541
Aflatoxins in wheat 697
Agaricus bisporus, shelf-life and quality 493
Air-drying, effects on detection of irradiated scampi tails 125
Albacore lipid and fatty acid composition 597
Alcohol deterpenation of black pepper oil 551
α-amylase, immobilized, as thermal process integrator 661
α-amylase, kinetics of hydrolysis of cassava starch by 465
Alternative technology, prickly pear sheet 353
Amaranth seed protein solubility in sodium sulphate and sodium chloride 337
Amines — cod freshness by gill air analysis of 261
Ammonia — cod freshness by gill air analysis of 261
Anaemia and ionizable iron in vegetarian fermented foods 221
Anaerobic digestion, cyanide loss in 329
Analytical methods for quality control of tomato paste 145
Apparent diffusion coefficient in osmotic dehydration 409
Apparent diffusion of salt diffusion in potato 443
Apricots, process parameters for hydrocooling 347
Araceae — Hydroxy fatty acid from seed oil of 77
Artichoke hearts, canning process optimization 41
  physical texture of canned 41
Artifacts in lipid methylation methods 597
Asparagus — modified atmosphere packaging and texture of 187
Aspergillus niger, culturing quality method 589
Assessing risks due to seafood consumption (Review) 243
Astaxanthin, dietary, carotenoids and colour of trout muscle 277

Bambara groundnut, protein and energy in rats 229
Bananas, chlorophyllase and chlorophyll loss 57
  explosion puffing 419
Barley and HCl-extractability of minerals 707
Beans in fermenting tempeh 81
Beef bones — Electron Spin Resonance trial on irradiated 111
Beef muscle osmotic pressure by differential scanning calorimetry 399
Belly-bursting and quality of roe capelin 93

Bengal gram, ionizable iron in 221
Bentonite production of clear guava nectar 435
β-cyanoalanine and cyanide loss during anaerobic digestion of cassava 329
β-hydroxyacyl-CoA-dehydrogenase distinguishes unfrozen from frozen-thawed fish 133
β-lactoglobulin denaturation of artichoke 313
β-lactoglobulin differential scanning calorimetry study 313
Bioavailability and ionizable iron in vegetarian fermented foods 221
Bioavailability of mineral in fermented barley 707
Biological values — protein and energy from maize-legume dishes 229
Bio-indicator — validation of a time-temperature-integrator 21
Bitter compounds in tangerines 65
Black gram, ionizable iron in fermented 221
Black pepper oil, alcohol deterpenation 551
Blanching losses in surface-frozen potato 653
Bocado mango — post-harvest ripening in 457
Bone, chicken irradiated, free radical yield 371
Bones — Electron Spin Resonance trial on irradiated 111
Bound water in heat treated soy protein isolate 565
Bran — morphology and milled product quality in maize 213
Bread — taste of sodium chloride and acids 201
Breadmaking properties of quinoa-wheat flour 701
Browning of controlled atmospheric stored mushrooms 493
Bulk pre-packaging of pork retail cuts 391
B. subtilis, and protein hydrolysate from chicken heads 9

Ca^{2+} removal, effect on whey protein isolate gels 615
Ca^{2+} uptake in hard-to-cook beans 683
Calibration response, microwave fat meter 137
Candida lambica in stored ready-to-use carrots 473
Candida parapsilosis in stored ready-to-use carrots 473
Candida sake in stored ready-to-use carrots 473
Candida tropicalis in stored ready-to-use carrots 473
Canthaxanthin, dietary, and colour of trout muscle 277
Capsicum annum L. var. Churaehong — carotenoid loss in dried 179
Carbon dioxide barrier packs for pork retail cuts 391
Carotenoid loss in dried red pepper products 179
Carotenoids and colour of trout muscle 277
Carrots, yeast flora of stored ready-to-use 473
Cassava peel, cyanide loss during anaerobic digestion 329
Cassava starch, kinetics of hydrolysis 465
Cassava utilization 465
Cavandish bananas, chlorophyllase and chlorophyll loss 57
Cell wall changes or asparagus, effects of packaging 187
Cell wall polysaccharides, modified atmosphere packaging and texture of asparagus 187
Centralized bulk pre-packaging of pork retail cuts 391
Centrifugation in production of clear guava nectar 435

Cereal-pulse combinations, ionizable iron in 221
Chenopodium quinoa WILLD flour blend for bread 701
Chicken bones, irradiated, free radial yield in 371
Chicken heads, protein hydrolysate from 9
Chicken meat, 2-dodecylcyclobutanine in radiation-sterilized 691
Chickpea tempeh, *S. aureous* in fermenting 81
Chlorophyll in ripening wax-coated Bocado mango 457
Chlorophyllase and chlorophyll loss in bananas 57
Chromobacterium viscosum lipase esterification of polyunsaturated fatty acids 73
Citric acid in quality control of tomato paste 145
Citrus reticulata bitter compounds in 65
Clear guava nectar production 435
Clupea harengus, variations in microwave fat meter response 137
Cod freshness by gill air analysis 261
Cod spoilage by gill air analysis 261
Colour and centralized bulk pre-packaging of pork retail cuts 391
Colour differences in explosion puffing of bananas 419
Colour of dry-fermented sausages on ripening 675
Colour of french fries 653
Colour of improved tomato pulp 427
Colour of trout muscle 277
Colourimetric measures of carotenoid-fed trout muscle 277
Comparative study of quality control of tomato paste 145
Concentration dependence in quality control of tomato paste 145
Consistency and rheological properties of milk and curd 305
Consistency of fruit pulp and powder collapse 531
Consistency of tomato paste 145
Controlled atmosphere storage, nectarines 507
Controlled atmospheric storage of mushrooms 493
Conventional air-dried bananas 419
Conventional vacuum-concentrated juice for tomato pulp 427
Cooked bean quality and water hardness 49
Cooked frozen french fries, texture 285
Cooked potato, starch retrogradation B
Cooking, effect on carotenoids and colour of trout muscle 277
  effect on irradiated chicken bones 371
Cooking before irradiation, effect of, on ESR of chicken bones 371
Cooking loss in wheat flour extrusion cooking 557
Cooking time, water hardness and cooked bean quality 49
Cook-chill foods, reduction of microwave penetration by salts 153
Cooling coefficient for apricots, plums and peaches 347
Core temperature, ion reduction of microwave penetration of foods by salts 153
Cowpea, protein and energy in rats 229
  water hardness and cooked bean quality 49
Cowpeas, hard-to-cook state 683
Crawfish — HADH distinguishes unfrozen from frozen-thawed 133
Crispness in texture of cooked frozen french fries 285
Culturing quality of dehydrated mycological media 589
Curd strength, rheological properties 305

Cured meat — photodegradation of the colour of ham 1
Cyanide loss during anaerobic digestion of cassava 329
Cyclopropenoid fatty acids from seed oil 77
Cynara scolymus L. — physical texture of canned artichoke hearts 41

Decimal reduction time of horseradish peroxidase and water activity 33
Degreening of bananas, effect of temperature 57
Dehydration, osmotic, and Fick's second law 409
Delayed ripening and fresh weight loss in wax-coated Bocado mango 457
Density and texture of cooked frozen french fries 285
Detection of irradiated scampi tails 125
Deteriorative changes in frozen stored pink perch mince 271
Dextran influence on legumin precipitation from salt solutions 629
Dialysis/diafiltration of whey protein isolate 615
Differential scanning calorimetry and beef muscle osmotic pressure 399
Differential scanning calorimetry of β-lactoglobulin 313
Differential scanning calorimetry study of heat treated soy protein isolate 565
Diffusion coefficient, osmotic dehydration and Fick's second law 409
Diffusion coefficient measurement of salt in potato 443
Diffusion coefficients in drying potatoes 541
Diffusion modelling in surface-frozen potato on blanching 653
Diffusional model in explosion puffing of bananas 419
Discoloration, water hardness and cooked bean quality 49
Dispersion numbers of extrusion cooked wheat flours 557
Docosahexaenoic acid esterification 73
Dough mixing and breadmaking properties of quinoa-wheat flour 701
Drying by explosion puffing of bananas 419
Drying fruit juices, enzymes and pulp factors 531
Drying of potato slices and process variables 541
Dry-fermented sausages, microorganisms, lipolysis and ripening 675
DSC study of heat treated soy protein isolate 565

Eating quality, modified atmosphere packaging and texture of asparagus 187
Effective diffusivities of water vapour in explosion puffing of bananas 419
Egyptian yoghurt, volatile flavour compounds in 87
Eicosapentaenoic acid esterification 73
Electron Spin Resonance and free radical yield in irradiated chicken bones 371
Electron Spin Resonance response in detection of irradiated scampi tails 125
Electron Spin Resonance trial on irradiated foods 111
Emulsifying capacity of frozen stored pink perch mince 271
Endopolygalacturonase for drying fruit concentrates 531
Energy utilization from maize-legume dishes by rats 229
Enterotoxin control by *S. aureus* in fermenting tempeh 81
Enzymatic esterification 73
Enzyme inactivation and water activity 33
Enzyme test distinguishes unfrozen from frozen-thawed fish 133
Enzyme treatment for drying fruit concentrates 531

Enzymic hydrolysis of protein from chicken heads 9
Enzymic time-temperature integrator 661
ESR, free radical yield in irradiated chicken bones 371
ESR response for detection of irradiated scampi tails 125
ESR trial on irradiated food 111
Esterification of polyunsaturated fatty acids 73
Estimation of irradiation dose in irradiated scampi tails 125
Ethrel treatment, chlorophyllase and chlorophyll loss in bananas 57
Ethylene treatment, chlorophyllase and chlorophyll loss in bananas 57
European ESR collaborative trial on irradiated food 111
Eutectic transformations in water-sucrose-sodium chloride solutions 159
Exocarp changes on post-harvest ripening in wax-coated Bocado mango 457
Exocarp chlorophyll degradation in Bocado mango 457
Explosion puffing of bananas 419
Extraction pressure, effect on bitter compounds in tangerine juice 65
Extrusion viscometry of SPI melt time-temperature and strain history 297
Extrusion-cooking of wheat flour, effect of screw profile 557
Exudate and yeast flora of stored, ready-to-use carrots 473

Farinograph properties of quinoa-wheat flour blends 701
Farmed Rainbow Trout muscle, carotenoids and colour 277
Fat and water content measurement in fish 137
Fat morphology and milled product quality in maize 213
Fat oxidation in frozen stored pink perch mince 271
Fatty acid composition methylation methods 597
Fat-meter response, variations in microwave 137
Fermentation, methanogenic — cyanide loss by 329
Fermented foods, ionizable iron in vegetarian 221
Fermented milk, rheological properties 305
Fermenting tempeh — inhibition by *L. plantarum*, *S. aureus* 81
Fibre morphology and milled product quality in maize 213
Fickian diffusion of salt in potato 443
Fick's second law, kinetic model for osmotic dehydration 409
Field-heat removal in apricots, plums and peaches 347
Fining in production of clear guava nectar 435
Fish, preservation of minced pelagic 171
  unfrozen distinguished from frozen-thawed fish 133
  variations in microwave fat meter response 137
Fish cracker, use of pre-gelatinized tapioca starch in 593
Fish freshness by gill air analysis 261
Fish handling, quality of roe capelin 93
Fish mince, frozen storage 271
Fish mince process 643
Fish muscle — lipid composition of salmon flesh 365
Fish odour — cod freshness by gill air analysis 261
Fish oil — esterification of polyunsaturated fatty acids 73
Fish processing — carotenoids and colour of trout muscle 277
Fish size and quality of roe capelin 93

Fish volatiles — cod freshness by gill air analysis 261
Flavour, improved in tomato pulp 427
Flavour loss of yoghurt 87
Flesh colour of trout muscle 277
Flour gelatinization and kinetics of hydrolysis of cassava starch 465
Food control systems for risks due to seafood consumption (Review) 243
Food cooking, ions reduce microwave penetration 153
Food ingredients — protein hydrolysate from chicken heads 9
Food safety — ions reduce microwave penetration 153
risks due to seafood consumption (Review) 243
Force-deformation maxima and physical texture of canned artichoke hearts 41
Fortified milk and curd, rheological properties 305
Fouling deposit from milk — differential scanning calorimetry study 313
Free fatty acids in frozen stored pink perch mince 271
Free radical yield from irradiated chicken bones 371
Freeable water in heat treated soy protein isolate 565
Freeze-damage and sucrose-sodium chloride solutions 159
Freeze-drying in detection of irradiated scampi tails 125
Freezing foods — water-sucrose-sodium chloride phase diagram 159
Freezing point osmometric method in beef muscle 399
French fries — texture of cooked frozen 285
Fresh fish detection by enzyme test 133
Freshness of cod by gill air analysis 261
Frozen french fries, texture of cooked 285
Frozen storage and quality of roe capelin 93
Frozen stored pink perch mince 271
Frozen-thawed fish distinguished from unfrozen 133
Fruit, Electron Spin Resonance trial on irradiated 111
Fruit juice powders, process and pulp factors 531
Fruit juice sugar analysis by ultrasonics 515
Fruit pre-cooling of apricots, plums and peaches 347
Frying time and texture of cooked frozen french fries 285
Functional properties of frozen stored pink perch mince 271
Functional properties of whey protein isolate 615

Gamma irradiation — detection of irradiated scampi tails 125
Gaseous atmosphere and detection of irradiated chicken bones 371
Gel properties of washed whiting mince 643
Gelling properties of whey protein isolate 615
Germ and morphology and milled product quality in maize 213
Gibbs free energy of water-sucrose-sodium chloride phase diagram 159
Gill air analysis and cod freshness and spoilage 261
Globulin/albumin ratio in amaranth seed proteins extracted by sodium sulphate and sodium chloride 337
Glucoamylase and kinetics of hydrolysis of cassava starch 465
Glucose syrup production from cassava starch 465
Glycine max, milk from sprouted, blanched 573
utilization and properties 81, 229, 297, 565, 573

Grain morphology/structure in maize 213
Grapes, irradiated Electron Spin Resonance trial on 111
Grated raw carrots, yeast flora of 473
Green gram, ionizable iron in 221
Grit fat content in maize morphology and milled product quality 213
Groundnut, protein and energy in rats 229
Growth inhibition of fermenting tempeh 81
Guava nectar, production of 435

H_2S production, cod freshness and measured by gill air analysis 261
HACCP — risks due to seafood consumption (Review) 243
HADH distinguishes unfrozen from frozen-thawed fish 133
Ham, mutagenic N-nitroso compounds in Chilean 385
  photodegradation of the colour of 1
Hard water, and cooked bean quality 49
'Hard-to-cook' defects, water hardness and cooked bean quality 49
Hard-to-cook state in cowpeas 683
Hazard assessment — risks due to seafood consumption (Review) 243
HCl-extractability of minerals and *rabadi* fermentation of barley 707
Headspace gas chromatography of volatile flavour compounds of yoghurt 87
Heat denaturation of milk protein by DSC 313
Heat treated soy protein isolates 565
Heat treatment and rheological properties of milk and curd 305
Heat-stable peroxidase as a time-temperature-integrator 21
High O_2-permeable film and yeast flora of stored ready-to-use carrots 473
High PUFA lipid composition of salmon flesh 365
High strain rate pendulum impact tests and texture of cooked frozen french fries 285
High-protein rice-soy snacks 715
Histamine and scombrotoxosis in seafood, letter and response 721
Horsebean tempeh, *S. aureus* in fermenting 81
Horseradish peroxidase, thermal stability and water activity of 33
Hot air explosion puffing of bananas 419
Hot- and cold-break products for improved tomato pulp 427
Hurdle technology for preservation of minced pelagic fish 171
Hydrocooling apricots of plums and peaches 347
Hydrolysis of cassava starch 465
Hydroxy fatty acid from seed oil 77
11-Hydroxy-*cis*,*cis*,5,8,-tetracosadienoic acid from seed oil 77

Ice storage, spoilage and sensory quality of smooth oreo dory 577
Illuminated chill cabinets, photodegradation of the colour of ham in 1
Immobilized enzymes as a time-temperature-integrator 21
Immobilized α-amylase as a time-temperature integrator 661
Inactivation kinetics of horseradish peroxidase and water activity 33
Inactivation temperatures of horseradish peroxidase and water activity 33
Instrumental tests of texture of cooked frozen french fries 285
Intact bovine muscle, of differential scanning calorimetry 399

Interactive packaging as protection against photodegradation of ham colour 1
Inter-laboratory Electron Spin Resonance trial on irradiated food 111
Invarient transformations in water-sucrose-sodium chloride phase diagram 159
Ionic strength and solubility of amaranth seed proteins in sodium sulphate and sodium chloride 337
Ionizable iron in vegetarian fermented foods 221
Ionized molecules reduce of microwave penetration of foods 153
Ions reduce microwave penetration of foods 153
Iron deficiency anaemia and ionizable iron in vegetarian fermented foods 221
Irradiated chicken bones, free radical yield 371
Irradiated food, detection by Electron Spin Resonance trial 111
detection in chicken bones 371
Irradiated food detection by 2-dodecylcyclobutanine 691
Irradiated food in detection of scampi tails 125
Irradiation conditions, detection in chicken bones 371
Irradiation dose, detection of irradiated scampi tails 125

Juice extraction methods and bitter compounds in tangerines 65

Keropok, use of pre-gelatinized tapioca starch in 593
Kinetic model for osmotic dehydration and Fick's second law 409
Kinetics of hydrolysis of cassava starch 465
Kinetics of salt diffusion in potato 443
Kramer shear force and physical texture of canned artichoke hearts 41

Lactic acid taste in water and bread 201
Lactic fermentation products of milk, rheological properties 305
Lactobacilli in ripening dry-fermented sausages 675
Lag factor in hydrocooling apricots, plums and peaches 347
Legume-maize dishes, protein and energy in rats 229
Legumin precipitation, influence of dextran in salt solutions 629
Lignin, modified atmosphere packaging and texture of asparagus 187
Limonin, a bitter compound in tangerines 65
Linamarin and cyanide loss during anaerobic digestion of cassava 329
Lipase activity in ripening dry-fermented sausages 675
Lipase esterification of polyunsaturated fatty acids 73
Lipid composition of salmon flesh 365
Listeria spp. and ion reducted microwave penetration of food 153
Loaf volume of bread with quinoa flour 701
Low strain rate flexure and texture of cooked frozen french fries 285
Low-energy preservation of minced pelagic fish 171
Low-moisture stability of horseradish peroxidase and water activity 33
L. plantarum inhibition of fermenting tempeh 81

Maize morphology and milled product quality 213

Maize-legume dishes, protein and energy in rats 229
Mallotus villosus and quality of roe capelin 93
Managing risks due to seafood consumption (Review) 243
Mangifera indica L., post-harvest ripening in 457
Mango, post-harvest ripening 457
Manihot esculenta Crantz, cyanide loss during anaerobic digestion 329
Mannitol in controlled atmosphere stored mushrooms 493
Marine foods, risks due to consumption (Review) 243
Maturity effect on the bitter compounds in tangerines 65
Meat, irradiated Electron Spin Resonance trial on 111
Meat by-products — protein hydrolysate from chicken heads 9
Meats, mutagenic N-nitroso compounds in 385
Mechanical properties and texture of cooked frozen french fries 285
Mechanically deboned fish mince, frozen storage of 271
Melt rheology of soy protein isolate 297
Melting onset temperature and beef muscle osmotic pressure 399
Merlangius merlangus process variables for surimi 643
Mesocarp, changes in post-harvest ripening of wax-coated Bocado mango 457
Methanogenic fermentation and cyanide loss 329
Methylation methods and fatty acid composition 597
Microbial load and photodegradation of the colour of ham 1
Microbiological stability, and physical texture of canned artichoke hearts 41
Microbiologically stable preservation of minced pelagic fish 171
Microbiology, in centralized bulk pre-packaging of pork retail cuts 391
Micrococci in ripening dry-fermented sausages 675
Microorganisms — seafood contamination (Review) 243
Microstructure on explosion puffing of bananas 419
Microwave dielectric properties of fish, variations in 137
Microwave fat meter response in fish, variations in 137
Microwave oven heating — ions reduce microwave penetration of foods 153
Micro-perforated film, modified atmosphere packaging and texture of asparagus 187
Milk, rheological properties of 305
Milled product quality in maize 213
Minced pelagic fish, preservation of 171
Mineral content, water hardness and cooked bean quality 49
Mineral extractability of *rabadi* fermented barley 707
Modelling osmotic dehydration using Fick's second law 409
Modified atmosphere storage and carotenoid loss in dried red pepper products 179
Modified atmosphere storage and yeast flora of ready-to-use carrots 473
Moisture content and time-temperature and strain history of SPI melt 297
Moisture loss in osmotic dehydration and Fick's second law 409
Molten flow properties and soy protein isolates 565
Monounsaturated fatty acids in salmon flesh 365
Morphology and milled quality in maize 213
Mucor miehei lipase esterification of polyunsaturated fatty acids 73
Multiconidial inoculation method for quality of mycological media 589
Musa spp. AAA, chlorophyllase and chlorophyll loss in 57
Mushroom maturity, quality texture, texture, shelf-life, respiration 493
Mutagenic N-nitroso compounds in Chilean ham and sausages 385

Mycological media, culturing quality method 589
Mycotoxins in wheat 697

NaCl taste in water and bread 201
Naringin, a bitter compound in tangerines 65
Natural fermentation and taste of sodium chloride and acids in water and bread 201
Natural toxins in seafood contamination (Review) 243
Nectarines, chilling, injury, ripening 507
  physiological disorders 507
Nemipterus japonicus, frozen storage of 271
Nephrops norvegicus, detection of irradiated tails 125
Net protein utilization from maize-legume dishes 229
Net protein utilization of rice-soy snacks 715
Nitramines in Chilean ham and sausages 385
Nitric oxide pigments and photodegradation of the colour of ham 1
Nitrogen atmosphere and carotenoid loss in dried red pepper products 179
Nitrosamines, nitrosodiethylamine, and nitrosodimethylamine in Chilean ham and sausages 385
NMR study of heat treated soy protein isolate 565
Norway lobster, detection of irradiated tails 125
NPU improvement from maize-legume dishes in rats 229
NPU of rice-soy snacks 715
Nuclear magnetic resonance study of heat treated soy protein isolate 565
Nucleotide changes in ice-stored smooth oreo dory 577
Nutritional enhancement of wheat flour for bread 701
Nutritional quality of protein hydrolysate from chicken heads 9
N-nitroso compounds in Chilean ham and sausages 385
Ochratoxin A in wheat 697
Off-flavour of yoghurt 87
Off-flavours and spoilage of smooth oreo dory in ice 577
Oil recovery from black pepper oil 551
Omega-3 and omega-6 fatty acids in salmon flesh 365
Oncorhynchus mykiss, carotenoids and flesh colour 277
Oncorhynchus nerka, lipid composition of flesh 365
Optimum harvesting time and bitter compounds in tangerines 65
Opuntia ficus indica sheet, a new fruit product 353
Osmosis and salt diffusion in hot potato 443
Osmotic dehydration and Fick's second law 409
Oxygen absorbers and photodegradation of the colour of ham 1

Packaging and texture of asparagus 187
Packaging film and yeast flora of stored ready-to-use carrots 473
Papaya, irradiated Electron Spin Resonance trial on 111
Parasites and seafood contamination (Review) 243
Partially cooked product for preservation of minced pelagic fish 171
Pasteurization and bitter compounds in tangerines 65
Pea tempeh, *S. aureus* in fermenting tempeh 81

Peaches, process parameters for hydrocooling 347
Peanut proteins, rheological properties of fortified milk and curd 305
Pear, prickly, a new fruit product 353
Pectinase in production of clear guava nectar 435
Peel colour and chlorophyllase and chlorophyll loss in bananas 57
Pelagic fish, preservation of minced 171
Pelagic fish, variations in microwave fat meter response 137
Pepper products, carotenoid loss in dried red 179
Perceived taste of sodium chloride and acids in water and bread 201
Perch mince, frozen storage of 271
Peroxidase validation of a time-temperature-integrator 21
pH and beef muscle, osmotic pressure 399
Phase diagram and equilibria of water-sucrose-sodium chloride 159
Phosphatidylchlorine, phosphatidylethanolamine and phospholipids in salmon flesh 365
Photodegradation of nitrosylmyochrome and colour of ham 1
Physical texture of canned artichoke hearts 41
Physiological disorders of nectarines 507
Phytate loss in fermented barley 707
Phytate phosphorus and ionizable iron in vegetarian fermented foods 221
Pink perch mince, frozen storage of 271
Piper nigrum L. oil 551
Pistachio nut shells, irradiated Electron Spin Resonance trial on 111
Plug flow digester and cyanide loss during anaerobic digestion of cassava 329
Plums, process parameters for hydrocooling 347
Polyunsaturated fatty acid esterification 73
Pork retail cuts, centralized bulk pre-packaging 391
Porosity and explosion puffing of bananas 419
Post-harvest deterioration, modified atmosphere packaging and texture of asparagus 187
Post-harvest ripening in wax-coated Bocado mango 457
Post-irradiation calibration of chicken bones 371
Potassium sorbate preservation of minced pelagic fish 171
Potato, cooked, conditioning for salad 637
  cooked, starch retrogradation 637
  kinetics of salt diffusion at high temperature 443
  salts reduce of microwave penetration 153
  surface-frozen, ascorbic acid diffusion on blanching 653
  texture of cooked frozen french fries 285
Potato slices and drying 541
Poultry bones, irradiated Electron Spin Resonance trial on 111
Prawns, detection of irradiated tails 125
Preservation of minced pelagic fish 171
Pressure drop and time-temperature and strain history of SPI melt 297
Pre-packaging of pork retail cuts 391
Prickly pear sheet, a new fruit product 353
Primafresh wax and post-harvest ripening in Bocado mango 457
Procambarus clarkii — HADH distinguishes unfrozen from frozen-thawed 133
Process control of sugars in fruit juices 515

Process lethality and validation of a time-temperature-integrator 21
Process optimization of protein hydrolysate from chicken heads 9
Process parameters for hydrocooling apricots, plums and peaches 347
Process variables and drying of potato slices 541
Process variables in fruit juice drying 531
Processing effects on rheological properties of milk and curd 305
Processing effects on the bitter compounds in tangerines 65
Protein changes in frozen stored pink perch mince 271
Protein enhancement of rice snacks 715
Protein extrusion of time-temperature and strain history of SPI melt 297
Protein hydrolysate from chicken heads 9
Protein rearrangement and time-temperature and strain history of SPI melt 297
Protein solubility of frozen stored pink perch mince 271
protein utilization in rats from maize-legume dishes 229
Prunus persica, chilling, injury, ripening 507
Pseudocyttus macalatus, sensory qualities of ice-stored 577
Pseudoplastic and fortified rheological properties of milk and curd 305
Psidium guajava L., clear nectar production 435
Pulp content and serum viscosity in fruit juices 531

Quality control of tomato paste 145
Quality indicators — bitter compounds in tangerines 65
Quality of bread with quinoa flour 701
Quality of controlled atmosphere stored mushrooms 493
Quality of milled maize 213
Quality of roe capelin 93
Quantitative extraction of amaranth seed proteins 337
Quasi-peritectic transformations in water-sucrose-sodium chloride phase diagram 159
Quinoa-wheat flour blends, dough mixing and breadmaking properties 701

Rabadi fermentation of barley and HCl-extractability of minerals 707
Radiation dose estimation in irradiated chicken bones 371
Radiation-sterilized chicken meat, 2-dodecylcyclobutanine 691
Rainbow Trout muscle carotenoids and colour 277
Reaction kinetics of β-lactoglobulin by DSC 313
Reciprocating extrusion of SPI melt 297
Red pepper products, carotenoid loss in dried 179
Redfeed level and quality of roe capelin 93
Reduced bacterial kill in microwave heating of foods 153
Reducing sugars in quality control of tomato paste 145
Refractive index measurement in fruit juices 515
Reheating of manufactured food — ions reduce of microwave penetration 153
Rehydration parameters in explosion puffing of bananas 419
Relative viscosity of frozen stored pink perch mince 271
Respiration rates and texture of modified atmosphere packaged asparagus 187
Respiratory climacteric and ripening of bananas 57

Retail display and photodegradation of the colour of ham 1
Rheological properties of fortified milk and curd 305
Rheology of extruded soy protein isolate 297
Rice, ionizable iron in 221
Rice-soy snacks, high protein 715
Ripening of wax-coated Bocado mango 457
Risk-based control measures, seafood consumption (Review) 243
Roe capelin, quality of 93
Rotational mobility of water and variations in microwave fat meter response 137
Rye bread flavour, taste of sodium chloride and acids 201

Salad potato, starch retrogradation and texture 637
Saline soluble proteins of amaranth seed 337
Salmo gairdneri — HADH distinguishes unfrozen from frozen-thawed 133
Salmon flesh, lipid composition of 365
Salmonella mutagenicity test on Chilean ham and sausages 385
Salmonella spp. in food — ions reduce microwave penetration 153
Salt, ions reduce microwave penetration of foods 153
Salt diffusion in hot potato 443
Salt reduction, taste effects in water and bread 201
Sample preparation for detection of irradiated scampi tails 125
Sardine scales, irradiated Electron Spin Resonance trial on 111
Sardines minced by hurdle technology, preservation 171
Sardinops sagex minced by hurdle technology, preservation 171
Sausages, dry-fermented, microorganisms, lipolysis and ripening 675
  mutagenic N-nitroso compounds in 385
Scampi tails, irradiated detection 125
Scanning electron microscopy of explosion puffed bananas 419
Scindapsus officinalis seed oil, a new hydroxy fatty acid 77
Scombrotoxosis, aetiology 721
Seafood consumption, risks due to (Review) 243
Seafood contaminated with microorganisms, parasites and natural toxins (Review) 243
Seasonal variations in microwave fat meter response of fish 137
Sensory profile of black pepper oil 551
Sensory properties of prickly pear sheet 353
Sensory quality and photodegradation of the colour of ham 1
Sensory quality of ice-stored fish 577
Sensory texture of cooked frozen french fries 285
Sequential extraction of amaranth seed proteins in sodium sulphate and sodium chloride 337
Serum viscosity and pulp content in fruit juices 531
Sesquiterpeneless oil from black peppers 551
Shear force and texture of modified atmosphere packaged asparagus 187
Shelf-life of centralized bulk pre-packaged pork retail cuts 391
Shelf-life and texture of modified atmosphere packaged asparagus 187
Shelf-life extension by controlled atmospheres storage of mushrooms 493
Shelf-life extension of minced pelagic fish 171

Shelf-life extension of soymilk 573
Shelf-life of cod by gill air analysis 261
Shelf-life of frozen stored pink perch mince 271
Skim milk powder fortified milk, rheological properties of 305
Smoke curing, carotenoids and colour of trout muscle 277
Smooth oreo dory, spoilage during storage in ice 577
Snack food, process variables in use of pre-gelatinized tapioca starch 593
Snacks, protein enhancement 715
Soaking method and osmotic pressure of beef muscle 399
Sockeye salmon, lipid composition of 365
Sodium chloride, kinetics of diffusion in potato 443
  solubility of amaranth seed proteins 337
  taste in water and bread 201
Sodium sulphate, solubility of amaranth seed proteins 337
Solid state horseradish peroxidase and water activity 33
Solids gain in osmotic dehydration and Fick's second law 409
Solubility of amaranth seed proteins in sodium sulphate and sodium chloride 337
Sorghum, ionizable iron in 221
Sourness of water and bread 201
Soy protein isolate, an extrusion time-temperature and strain history 297
Soy protein isolates and heat treatment 565
Soyabean, protein and energy values in rats 229
Soybean tempeh, *S. aureus* in fermenting tempeh 81
Soyflour, full-fat snacks 715
Soymilk from sprouted soybeans, stabilized for tropical storage 573
Spoilage and sensory quality in ice-stored smooth oreo dory 577
Spoilage of cod indicated by gill air analysis 261
Sprattus sprattus — variations in microwave fat meter response 137
Sprouted soybeans and stabilized soymilk 573
Stabilized soymilk for ambient tropical storage 573
Staphylococcus aureus in fermenting tempeh 81
Starch, cassava, kinetics of hydrolysis 465
Starch gelatinization in wheat flour extrusion cooking 557
Starch retrogradation and texture of cooked potato 637
Steam explosion puffing of bananas 419
Storage, centralized bulk pre-packaged pork retail cuts 391
Storage and rheological properties of fortified milk and curd 305
Storage effect on detection of irradiated scampi tails 125
Storage effect on irradiated chicken bones 371
Storage life of preservated minced pelagic fish 171
Storage of cooked salad potato 637
Storage of frozen pink perch mince 271
Storage of irradiated chicken, detection of irradiation 691
Storage/holding time and quality of roe capelin 93
Stored ready-to-use carrots, yeast flora 473
Strain and time-temperature history of SPI melt 297
Strain rate and texture of cooked frozen french fries 285
Sugar analysis in fruit juice by ultrasonic velocity 515
Surface-frozen potato, ascorbic acid diffusion on blanching 653

Surimi processing variables 643
Syneresis in ultrafiltration for improved tomato pulp 427

Tangerines, bitter compounds in 65
Tapioca starch, pre-gelatinized in snack food 593
Taste interaction of sodium chloride and acids in water and bread 201
Teen-Eddin, from prickly pear, a new fruit product 353
Tempeh, *S. aureus* and growth in 81
Temperature, effect on carotenoids, chlorophyllase activity, chlorophyll degradation in bananas 57
high, kinetics of salt diffusion in potato 443
Temperature of irradiation, effect on chicken bones 371
Temperature reduction by ions in microwave cooking of foods 153
Texture, effect of water hardness on cooked bean quality 49
improved in tomato pulp 427
Texture of controlled atmosphere stored mushrooms 493
Texture of cooked frozen french fries 285
Texture profile of salad potato 637
Thai tangerine juices, bitter compounds in 65
Thawing conditions and quality of roe capelin 93
Thawing foods, relevance of water-sucrose-sodium chloride phase diagram 159
Thermal loss parameters and physical texture of canned artichoke hearts 41
Thermal processing modelling, time-temperature integrator 661
Thermal stability of horseradish peroxidase 33
Thermodynamic equilibria of water-sucrose-sodium chloride 159
Thermodynamic incompatibility of biopolymers 629
Thunnus alalunga methylation methods for lipid analysis 597
Time to half-cool for apricots, plums and peaches 347
Time-temperature and strain history of SPI melt 297
Time-temperature integrator, immobilized α-amylase from *B. licheniformis* 661
validation of 21
Tomato paste, quality control and analysis 145
Tomato pulp, ultrafiltration of 427
Torrymeter compared with cod freshness by gill air analysis 261
Total acidity in quality control of tomato paste 145
Total solids content and rheological properties of milk and curd 305
Total viable counts and cod freshness by gill air analysis 261
Toxins, natural and seafood contamination (Review) 243
Triglycerides of salmon flesh 365
Tropical storage of soymilk 573
Trout, HADH distinguishes unfrozen from frozen-thawed 133
irradiated Electron Spin Resonance trial on 111
Trout muscle carotenoids and colour 277
TTI-system, and validation of a time-temperature-integrator 21
2-dodecylcyclobutanine in radiation-sterilized chicken meat 691

UDA test on Chilean ham and sausages 385

Ultrafiltration for improved tomato pulp 427
Ultrafiltration in production of clear guava nectar 435
Ultrasonics for sugar analysis in fruit juices 515
Ultrasound scattering by precipitation protein 629
Unfrozen fish, distinguished from frozen-thawed 133
Unscheduled DNA synthesis and mutagenic N-nitroso compounds in ham and sausages 385

Vacuum belt drying of fruit juices 531
Vacuum packaging and photodegradation of the colour of ham 1
Validation of a time-temperature-integrator 21
Variations in microwave fat meter response in fish 137
Vegetarian fermented foods, ionizable iron in 221
Vigna anguiculata, hard-to-cook state 683
Vigna unguiculata L. Walp, water hardness and cooked bean quality 49
Viscosity, relative, of frozen stored pink perch mince 271
Viscosity and rheological properties of fortified milk and curd 305
Volatile acidity in quality control of tomato paste 145
Volatile component losses in guava nectar 435
Volatile components improved tomato pulp 427
Volatile flavour compounds of yoghurt 87

Waste utilization with protein hydrolysate from chicken heads 9
Wasted by-catch — frozen stored pink perch mince 271
Water absorption in hard-to-cook beans 683
Water activity and carotenoid loss in dried red pepper products 179
Water activity and horseradish peroxidase 33
Water activity and preservation of minced pelagic fish 171
Water binding capacity of frozen stored pink perch mince 271
Water content meter, variations in fish 137
Water diffusion in drying potatoes 541
Water hardness and cooked bean quality 49
Waterstate and SPI melt flow properties 565
Water-sucrose-sodium chloride phase diagram 159
Wax coatings and post-harvest ripening in Bocado mango 457
Wheat, ionizable iron in 221
ochratoxin A and aflatoxins in 697
Wheat flow extrusion cooking, effect of screw profile 557
Whey protein isolate, gelling properties of 615
Whey protein isolate solubility and pH, Ca^{2+} and additives 615
Whiting mince process variables for surimi 643
Whole pepper, carotenoid loss 179

Xanthophylls and ripening of bananas 57

Yeast flora of stored ready-to-use carrots 473
Yoghurt — volatile flavour compounds 87

Zea mays L., morphology and milled product quality 213
z-value, and physical texture of canned artichoke hearts 41
z-value for horseradish peroxidase, and water activity 33
z-value in validation of a time-temperature-integrator 21
